OSINT
Inteligencia de fuentes abiertas

\$>Whoami

Juan Antonio Calles (@jantonioCalles)

- CEO de [Grupo Zerolynx](#)
- CSO de [Osane Consulting](#)
- Doctor, doble postgrado e ingeniero en informática por la URJC
- Co-fundador de Flu Project y XIRedMasSegura

¿Qué es la Ciberinteligencia?

- La ciberinteligencia es un término que ha sido acuñado para hacer referencia a las labores de inteligencia que requieren o tienen como destino el uso de sistemas de información. Su objetivo principal es el de recolectar y analizar datos, para generar información de valor que ayude a contestar una serie de cuestiones planteadas.
- Generalmente, la ciberinteligencia es utilizada en el mundo empresarial para identificar datos o **archivos exfiltrados**, localizar a **detractores de las marcas**, o alertar de la posible perpetración de un **ataque cibernético**.
- Al final, el valor en la inteligencia es poder extraer una gran cantidad de datos, correlarlos y analizarlos en tiempo y forma, para poder obtener información de valor que nos permita contestar esas preguntas que antes comentábamos.

El secreto está “en las fuentes”

Fuentes de inteligencia

- HUMINT: fuentes humanas
- SIGINT / ELINT: señales eléctricas
- GEOINT: información geoespacial
- COMINT: interceptación de comunicaciones
- OSINT: fuentes abiertas

Ciclo de inteligencia

Lo primero será “protegernos”

Hay que forjarse identidades digitales anónimas

 - PureVPN
 - PrivateVPN

Los buscadores y sus potentes expresiones de búsqueda

Google Hacking

- **site:** permite listar toda la información de un dominio concreto.
- **ext:** permite buscar archivos de un formato determinado, por ejemplo pdfs, rdp (de escritorio remoto), imágenes png, jpg, etc. para obtener información EXIF y un largo etcétera.
- **intitle:** permite buscar páginas con ciertas palabras en el campo title.
- **inurl:** permite buscar páginas con palabras concretas en la URL.
- Interesante buscar frases tipo “**index of**” para encontrar listados de archivos de ftps, “**mysql server has gone away**” para buscar sitios web vulnerables a inyecciones SQL en Mysql, etc.

Google Hacking

- “*@empresa.com”: Emails/cuentas de dominio de empleados
- `ext:rdp screen`: Nos permitirá localizar archivos RDP (Remote Desktop Protocol), para conectarnos a Terminal Services y que podremos utilizar en la fase de fingerprint para obtener más información
- `ext:log ip`: Nos permitirá localizar archivos de logs.
- `ext:ini inurl:"/Desktop.ini"`: Nos permitirá listar carpetas Windows expuestas
- `inurl:"dominio:8080"` Con el que localizaremos aplicaciones tras puertos concretos

Google Hacking

- `ext:ovpn "C:\" client`: Expone archivos de configuración de Open VPN alojados en la unidad C: de un sistema.
- `ext:sql`: Nos permitirá localizar archivos con instrucciones SQL
- `ext:sql user password`: Recuperando credenciales
- `ext:db "select *"`: Profundizando en queries más concretas de selección
- `ext:sql "create table"`: Recuperando la creación de tablas

Google Hacking

- `inurl:"readme.html" ext:html intitle:wordpress`: Buscando wordpress en Internet
- `inurl:wp-admin -site:wordpress.* "Parent Directory"`: Buscando el código fuente
- `inurl:bash_history mysql "-u"`: Historiales de bash
- `inurl:bash_history scp "/home"`: Carpetas Home indexadas en comandos scp
- `inurl:bash_history scp "/root"`: Carpetas del usuario Root

Google Hacking

- `inurl:bash_history scp "/var/www"`: Carpetas de Apache
- `inurl:bash_history "*.sql"`: archivos sql listados en historiales
- `ext:ica wfclient application servers`: archivos de conexión a sistemas citrix
- `ext:txt inurl:robots`: ¿qué ocultan las organizaciones en el fichero robots.txt?
- `ext:pdf intitle:"documents and settings"`: Rutas Windows expuestas

Google Hacking

- "apache/1.3.27 server" "port 80": buscando versiones de un servidor

Not Found

The requested URL

Apache/1.3.27 Serv

Server Error

404 - File or directory not found.

The resource you are looking for might have been removed, had its name changed, or is temporarily unavailable.

Google Hacking

- `inurl:login inurl:?user intitle:main inurl:pass intitle:cpanel`

Google Hacking

- inurl:phpmyadmin "information_schema" filetype:php

The image shows a Google search for the query `inurl:phpmyadmin "information_schema" filetype:php`. The search results display several entries, including:

- `file.com / db503580807.db.1and1.com ...`
- `information_schema.VIEWS running on localhost ...`
- `bank.com / localhost / information_schema ...`
- `information_schema running on localhost - phpMyAdmin 2.5 ...`

Overlaid on the search results is a screenshot of the phpMyAdmin interface. The interface shows the 'PARTITIONS' table in the 'information_schema' database. The SQL query executed is:

```
SELECT * FROM PARTITIONS LIMIT 0, 30
```

The results table is as follows:

TABLE_CATALOG	TABLE_SCHEMA	TABLE_NAME	PARTITION
NULL	information_schema	CHARACTER_SETS	NULL
NULL	information_schema	COLLATIONS	NULL
NULL	information_schema	COLLATION_CHARACTER_SET_APPLICABILITY	NULL
NULL	information_schema	COLUMNS	NULL
NULL	information_schema	COLUMN_PRIVILEGES	NULL
NULL	information_schema	ENGINES	NULL
NULL	information_schema	EVENTS	NULL
NULL	information_schema	FILES	NULL
NULL	information_schema	GLOBAL_STATUS	NULL
NULL	information_schema	GLOBAL_VARIABLES	NULL
NULL	information_schema	KEY_COLUMN_USAGE	NULL

Bing Hacking

- **Domain:** ayuda a identificar subdominios
- **IP:** permite buscar sitios alojados tras una dirección IP

Otros buscadores

- <https://yandex.com/>
- <https://www.exalead.com/search/>
- <https://duckduckgo.com/>
- <https://www.baidu.com/>
- <https://scholar.google.es/>

Herramientas para automatizar el hacking con buscadores

Anubis: *cámaras, impresoras, ...*

Foca: *extrayendo metadatos de documentos*

Buscadores de activos expuestos

SHODAN

Shodan

- Es un motor de búsqueda pero a diferencia de Google o Bing se encarga de indexar a nivel de servicio y puerto y no solo el servicio web.
- También tiene filtros avanzados.
- **Web:** <https://www.shodan.io>

Shodan

- **country:** Permite filtrar por sistemas publicados en país en concreto.
- **city:** Filtrar por ciudad en la que se encuentra un sistema.
- **geo:** Puedes afinar más aún la búsqueda por las coordenadas de latitud y longitud.
- **port:** Permite hacer búsqueda por el puerto específico.
- **net:** Realiza una búsqueda por una IP específica o por rangos de IP.
- **os:** Búsqueda basada en el sistema operativo.
- **hostname:** Realiza una búsqueda que coincida con el nombre del host.
- **before/after:** Limita la búsqueda a un periodo concreto.

Extracción de datos sobre dominios/IPs de organizaciones

WayBack Machine

Zone-h

The screenshot shows the Zone-H.org website interface. At the top, there is a navigation menu with links for Home, News, Events, Archive, Onhold, Notify, Stats, Register, and Login. A search bar is located on the right side of the menu. Below the menu, the main content area displays a list of defacements. The list includes columns for Date, Notifier, H, H, R, L, Domain, OS, and View. The defacements are listed in chronological order from 2016/05/05 to 2016/05/05. The list includes various domains such as asdo.gov.its/index.php, dl.fslm.gov.ni/images/Moroccan..., pbr-barjarmasin.go.id/perpustakaan..., univ.pa-muarabungo.go.id/pustak..., lokchang.go.th, mang3nls.go.th/saiys.txt, simpel.kpp.go.id/v00.html, psh.kpp.go.id/v00.html, gnti.asnla.gov.vn/images/giao.txt, d.nasip.nttprov.go.id/yeah.htm, forumnt.nttprov.go.id/yeah.htm, birpp.nttprov.go.id/yeah.htm, saikomod2013.nttprov.go.id/y..., bid.nttprov.go.id/yeah.htm, birup.nttprov.go.id/yeah.htm, rikorta2000.nttprov.go.id/yeah..., simpar.nttprov.go.id/yeah.htm, ppod.nttprov.go.id/yeah.htm, drbas.nttprov.go.id/yeah.htm, jrtasaramozialatotambo.gob.ac..., gadimbaya.gob.ac, gadunicalhuasqui.gob.ac, atitgn.jua.br/a.htm, proyectos.aragaa.gob.vg/ol.htm, and univ.ctsi.gov.it/Sam_Adoc.html. The OS column for all entries is Linux, and the View column contains a link labeled 'mirror'. Below the list, there is a disclaimer and a footer with navigation links and attribution information.

Sitios web de “pegado” de contenidos

Búsquedas principales en redes sociales

Twitter

- Twitter:
 - <https://twitter.com/search-advanced>

The image shows a screenshot of the Twitter website's advanced search page. The navigation bar at the top includes 'Inicio', 'Momentos', 'Notificaciones', 'Mensajes', a search icon, a profile picture, and a 'Twitter' button. The main content area is titled 'Búsqueda avanzada' and is divided into several sections with input fields:

- Palabras:** Includes options for 'Todas estas palabras', 'Esta frase exacta', 'Cualquiera de estas palabras', 'Ninguna de estas palabras', and 'Estos #hashtags'. The 'Escrito en' dropdown is set to 'Todos los idiomas'.
- Personas:** Includes options for 'Desde estas cuentas', 'Para estas cuentas', and 'Mencionando estas cuentas'.
- Lugares:** Includes 'Cerca de este lugar' with a '+ Añadir ubicación' button.
- Fechas:** Includes 'De esta fecha' with a date range selector.

A blue 'Buscar' button is located at the bottom of the search form.

Twitter

- Es recomendable construir una lista de personas “clave” para nuestra labor de Inteligencia.

Datos sobre personas y perfiles

¿Qué hay en Internet sobre una persona?

- <http://webmii.com>

The screenshot displays the WebMii website interface. At the top left is the WebMii logo. A search bar contains the name "Juan Antonio Calles" with a "Buscar" button and a user profile icon. Below the search bar, there are filters for "filtrar números" and "Internacional". A banner below the search bar states: "Esta página es una compilación de información pública generada en tiempo real". The main profile section features a circular profile picture of Juan Antonio Calles, his name "Juan Antonio Calles", and his title "CEO & Co-founder at Zerolynx Group, CEO at Osane". Below this, a "Score: 6.16" is displayed. The "Fotos" section shows a grid of images, including a "CriptoCert" logo and various professional photos. The text "powered by Google Custom Search" is visible on the right side of the photo grid.

Buscando direcciones físicas

- <http://www.abctelefonos.com>

The screenshot displays the 'abc telefonos' website interface. At the top left is the 'abc telefonos' logo. To its right are three tabs: 'Buscar una Empresa' (selected), 'Buscar una Persona', and 'Buscar por Dirección'. Below these is a search bar with the text 'Ingresa apellido/s y nombre/s de la persona que buscas'. The search input contains 'calles garcia juan'. To the right of the search bar is a dropdown menu set to 'España' with a 'Cambiar' link, and a search button with a magnifying glass icon. Below the search bar is a large empty white box with a close button (X) in the top right corner. Underneath this box, the heading 'Calles Garcia Juan en España' is displayed with a horizontal orange line below it. The search results show a list of entries. The first entry is 'Calles Garcia Juan' followed by a blacked-out address and the phone number '+34 9 [blacked out] 322'. Below this, the address is further detailed: 'Cal [blacked out] Toledo España'. To the right of the address are two orange buttons: 'Ver Informe Comercial' and 'Administrar mi Registro'. To the left of the address is a light blue button labeled 'Editar registro'.

Contraseñas leakeadas

- <https://hacked-emails.com>
- <https://haveibeenpwned.com>

The screenshot shows a website with a dark background featuring a keyboard. The main heading is "Has my email been hacked?" in white. Below it, a subtitle reads "Anonymously check if your email has been compromised and help us verify the validity of possible breaches". There is a search form with a white input field labeled "E-mail address:" and a purple "CHECK" button. Below the form are three statistics:

Icon	Statistic	Description
	6.243.980.440 addresses	We index security breaches that contain email addresses.
	137.747 leaks found	We monitor paste websites in real time, including the Deep Web!
	538.046 new emails	And just in the past week! We find new leaks on real time, amazing, right?

Verified Personal USA Paypal Accounts

I have available a limited supply of Verified Personal or Business Paypal accounts with Zero Balance.

These accounts make excellent middleman accounts for money transfer.

These accounts are verified with either a credit card or bank account attached and have verified transaction history.

USA accounts only unless you ask via PM for other countries. We sometimes have UK and other EU nations.

Conclusiones

- La *ciberinteligencia* no depende “de una herramienta o de un conjunto de herramientas”.
- Al igual que en la *Inteligencia*, depende de tener buenas fuentes.
- Y por supuesto..., **de saber explotarlas.**
